A new path to understanding vision

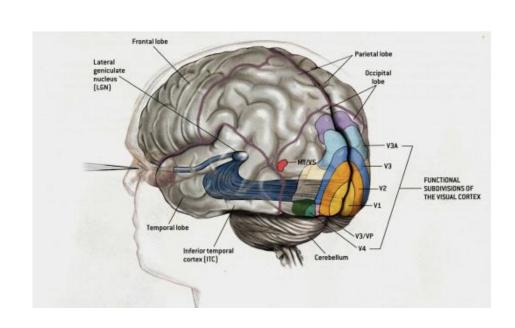

from the perspective of the primary visual cortex

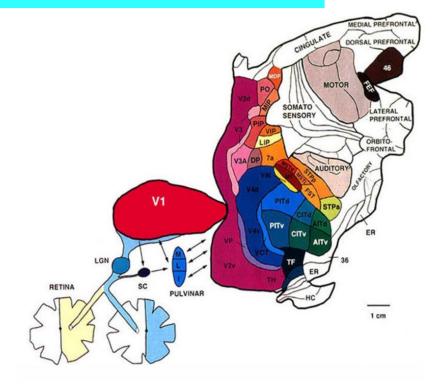

A new path to understanding vision

Traditional paths to understanding vision

- (1) Low level vision, mid-level vision, high-level vision
- (2) David Marr: primal sketch, 2.5 d sketch, 3-d model.

Li Zhaoping
July 16, 2018, presented at APCV 2018,
HangZhou, China

Talk outline

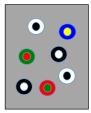

(1) The functional role of the primary visual cortex (V1)

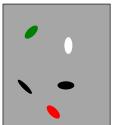

(2) In light of V1's role →
a new plan to understanding vision

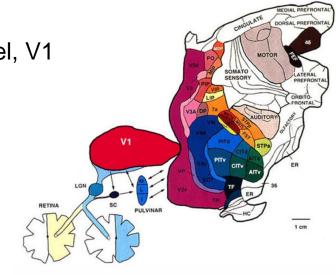

(3) A first example study in this new plan

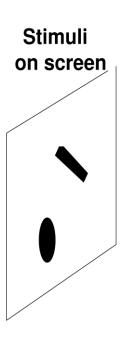

The primary visual cortex (V1)

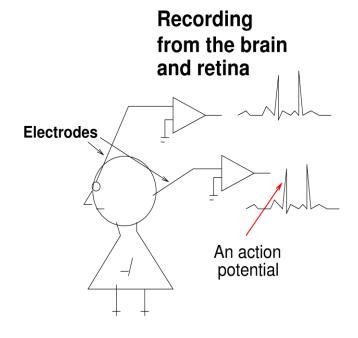

1953, Stephen Kuffler, retina, 1959-- Hubel and Wiesel, V1

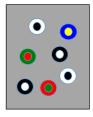

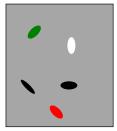

The primary visual cortex (V1)

1953, Stephen Kuffler, retina, 1959-- Hubel and Wiesel, V1

Then ...

Experimentally: V1 and beyond

Theoretical/modelling, Reichardt, Marr, etc.

2005: How close are we to understand V1? Olshausen and Field 2005

Do we really know what the early visual system does?

Carandini, Demb, Mante, Tolhurst, Dan, Olshausen, Gallant, Rust, 2005

Standard models of V1 neural receptive field (combining filtering, rectification, squaring, normalization) captures only 15-35% of the variances in V1 responses.

2012, David Hubel, in answer to "What Do You Feel Are the Next Big Questions in the Field?"

"We have some idea ... for the retina, the lateral geniculate body, and the primary visual cortex, but that's about it."

(Hubel & Wiesel 2012, Neuron)

The primary visual cortex (V1)

1953, Stephen Kuffler, retina.

1959-- Hubel and Wiesel, V1

Then ...

Experimentally: V1 and beyond Theoretical/modelling, Reichardt, Marr, etc.

2005: How close are we to understand V1?

Olshausen and Field 2005

Do we really know what the early visual system does?

Carandini, Demb, Mante, Tolhurst, Dan, Olshausen, Gallant, Rust, 2005

Standard models of V1 neural receptive field combining linear filtering, rectification and squaring, and response normalization **captures only 15-35% of the variances in V1 responses**.

2012, David Hubel, in answer to "What Do You Feel Are the Next Big Questions in the Field?"

"We have some idea ... for the retina, the lateral geniculate body, and the primary visual cortex, but that's about it."

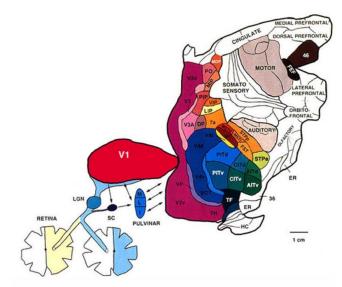

(Hubel & Wiesel 2012, Neuron)

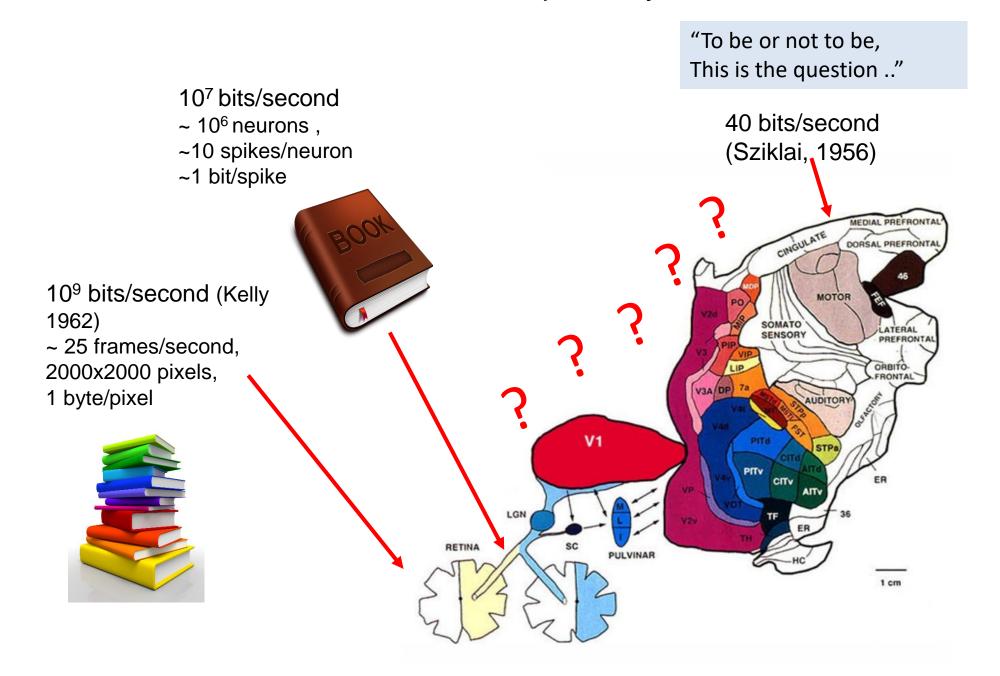

Questions:

Is a lack of understanding of V1 bindering our progress beyond V1?

Physiologically

Functionally (in behaviour)?

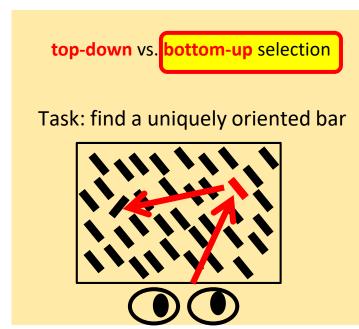

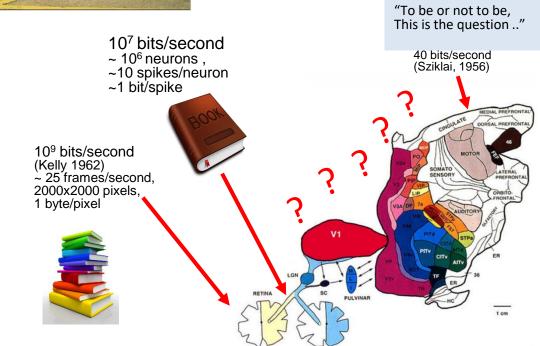

We are nearly blind!

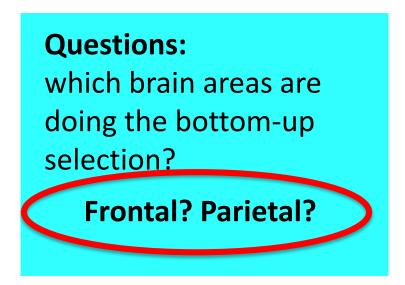

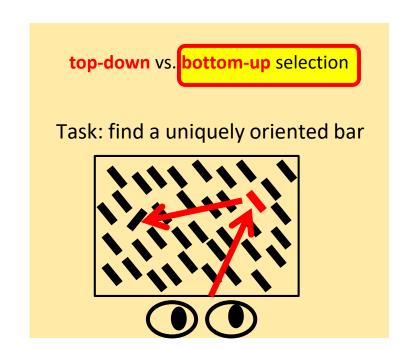

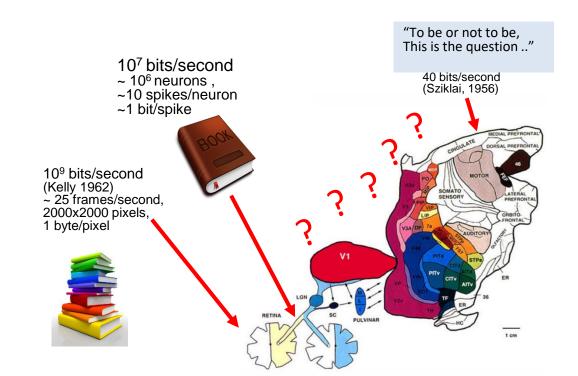

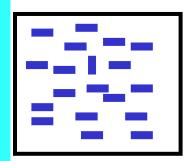

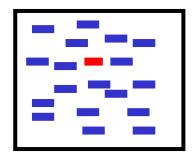

Questions:

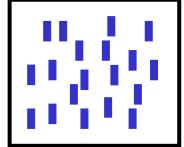

which brain areas are doing the bottom-up selection?

Frontal? Parietal?

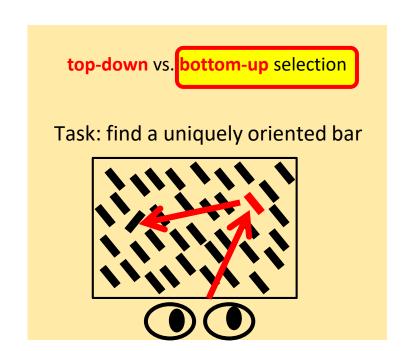

Saliency regardless of visual features

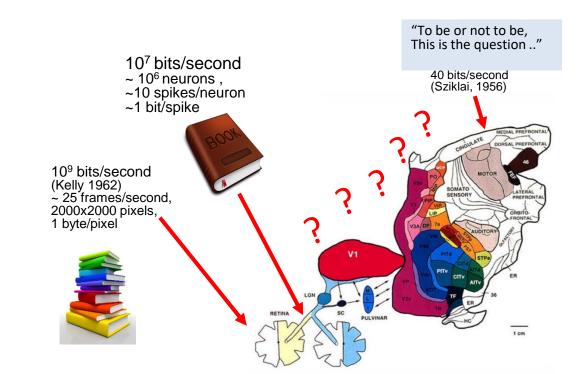

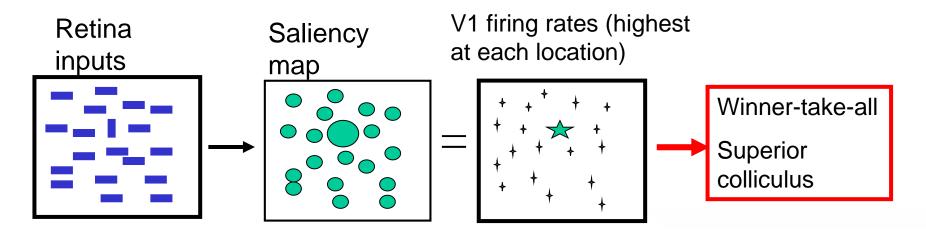

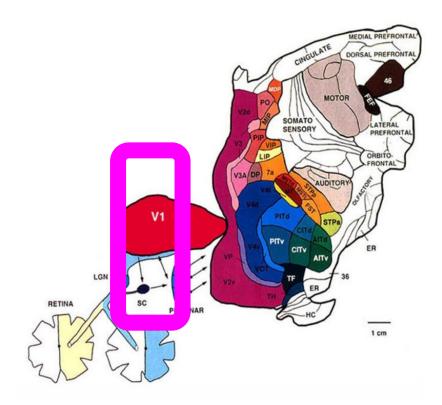

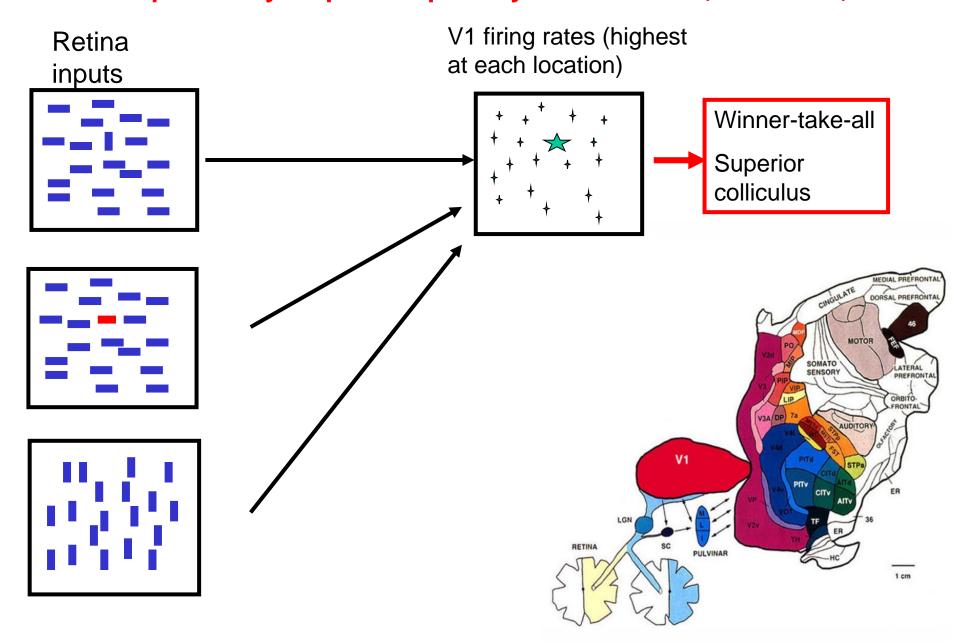

Koch & Ullman 1985, Itti & Koch 2001, etc

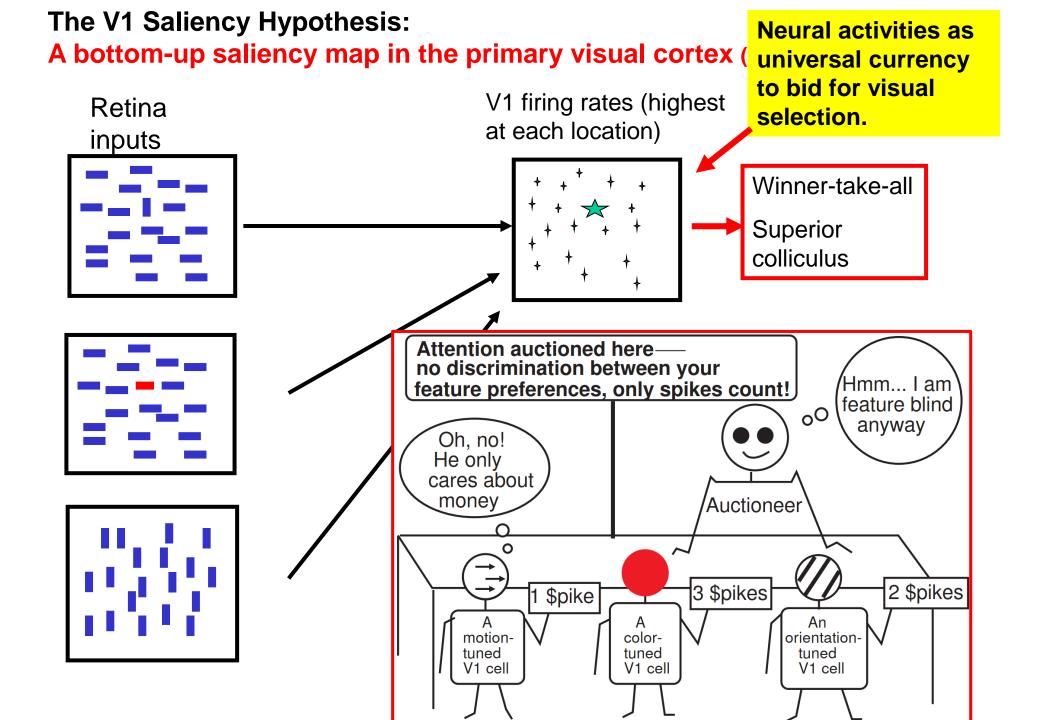

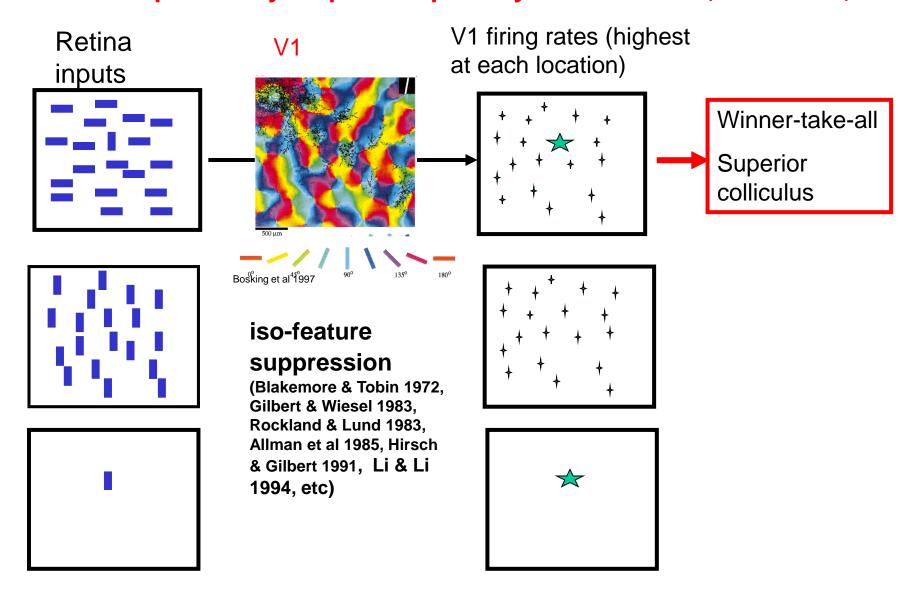

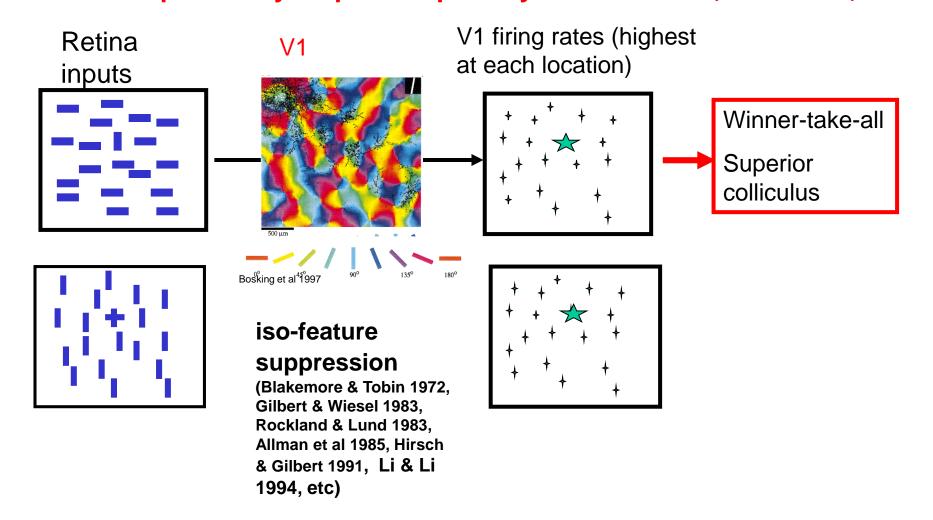

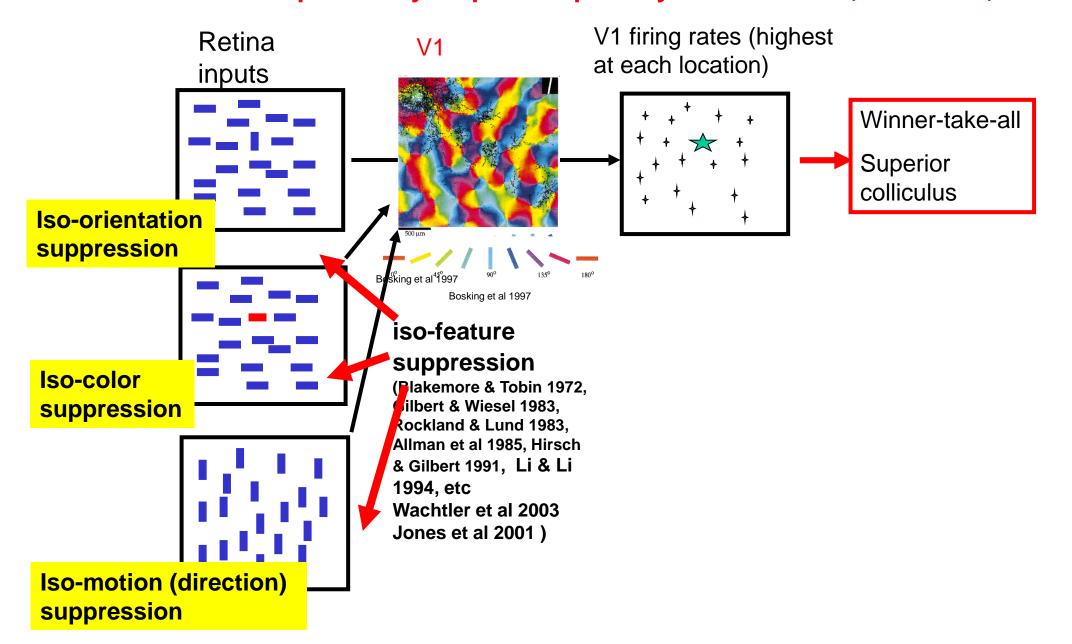

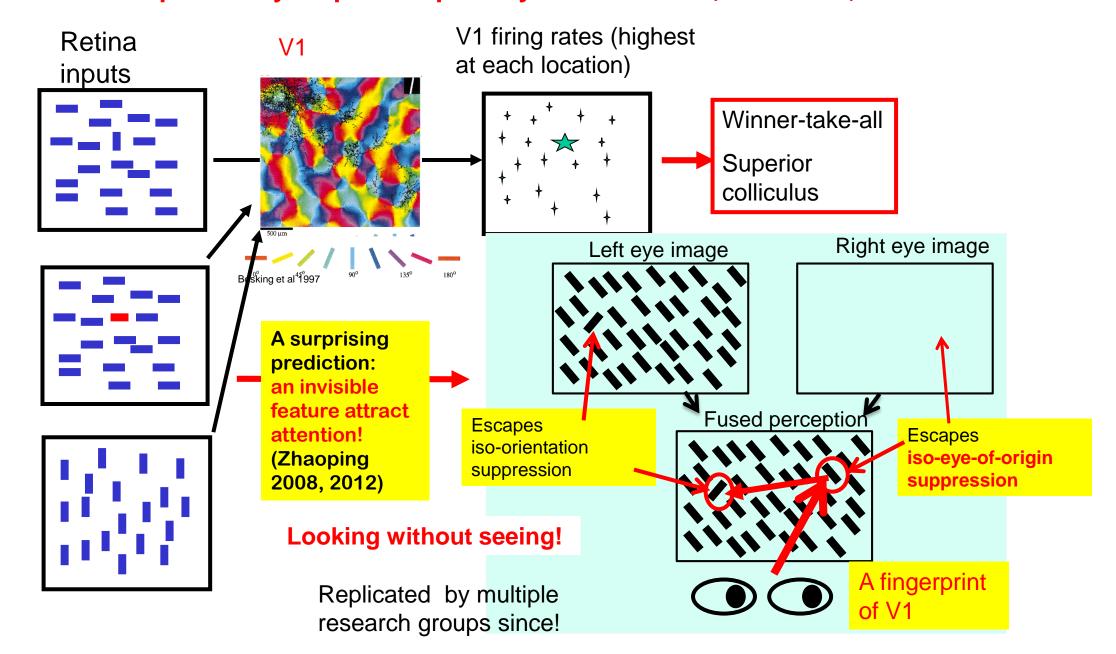

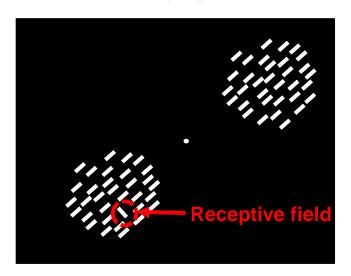

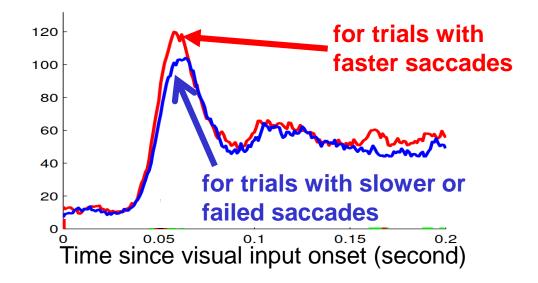

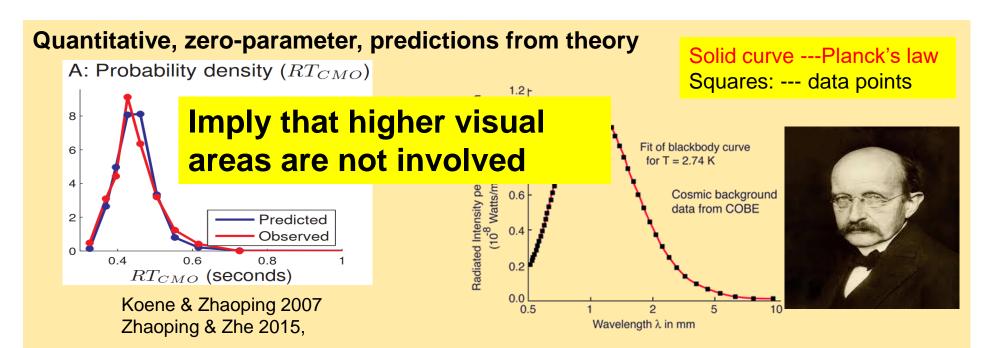

Testing the V1 theory on behaving monkeys --- Yan, Zhaoping, & Li, Submitted.

V1 neural responses to input stimulus (spikes/sec)

Saccade to an uniquely oriented bar ASAP

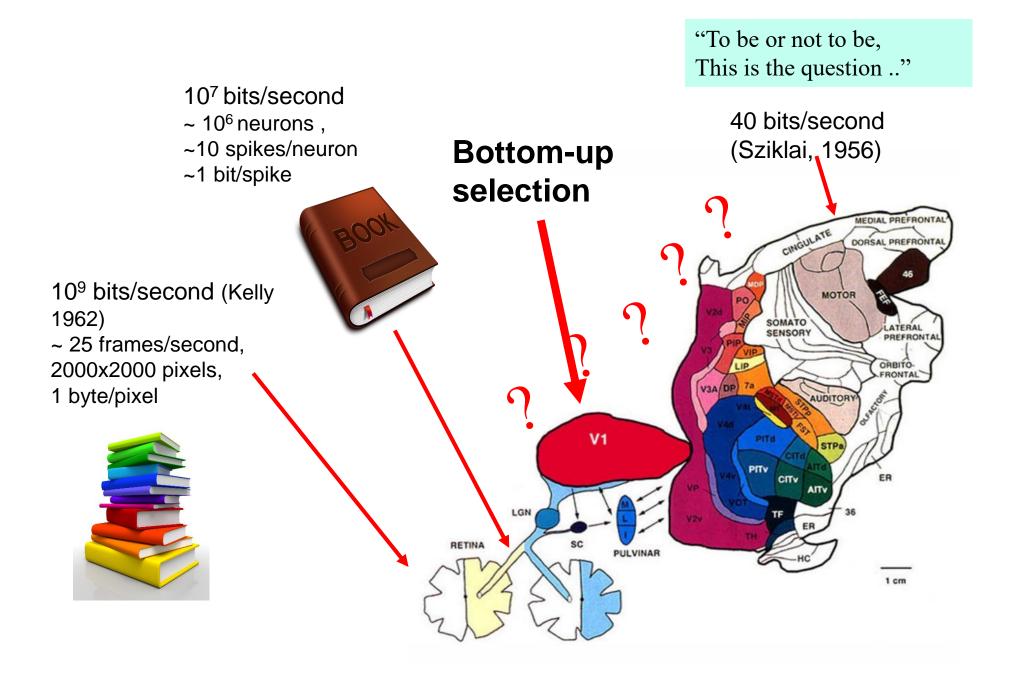

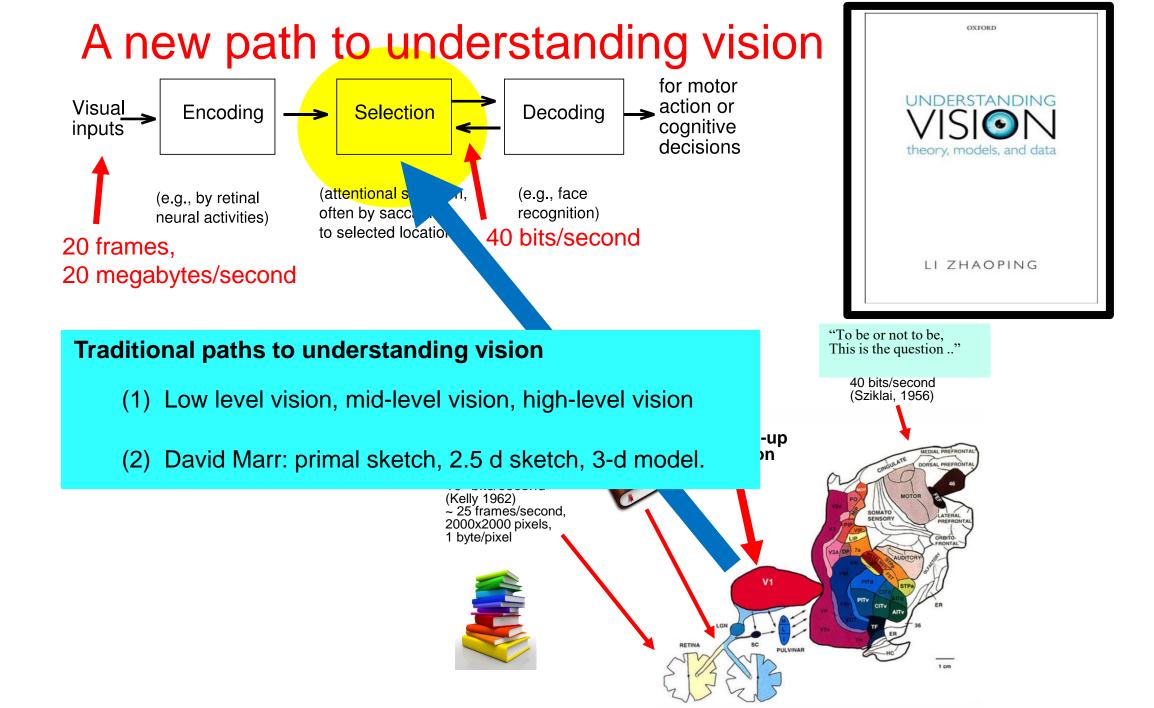

Talk outline

(1) The functional role of the primary visual cortex (V1) ← Attentional selection

A new path to understanding vision

Summation percept dominant

Perception = ?

In V1, signals are efficiently encoded by these two de-correlated channels (Li & Atick 1994)

Subject task: report the perceived tilt.

Why does perception prefer ocular summation? (Zhaoping 2017)

for analysis-by-synthesis (c.f. predictive coding) Higher areas Feedback to verify Ocular sum Ocular diff V1 Left eye Right Retina

Feedforward, feedback, verify, and re-weight (FFVW)

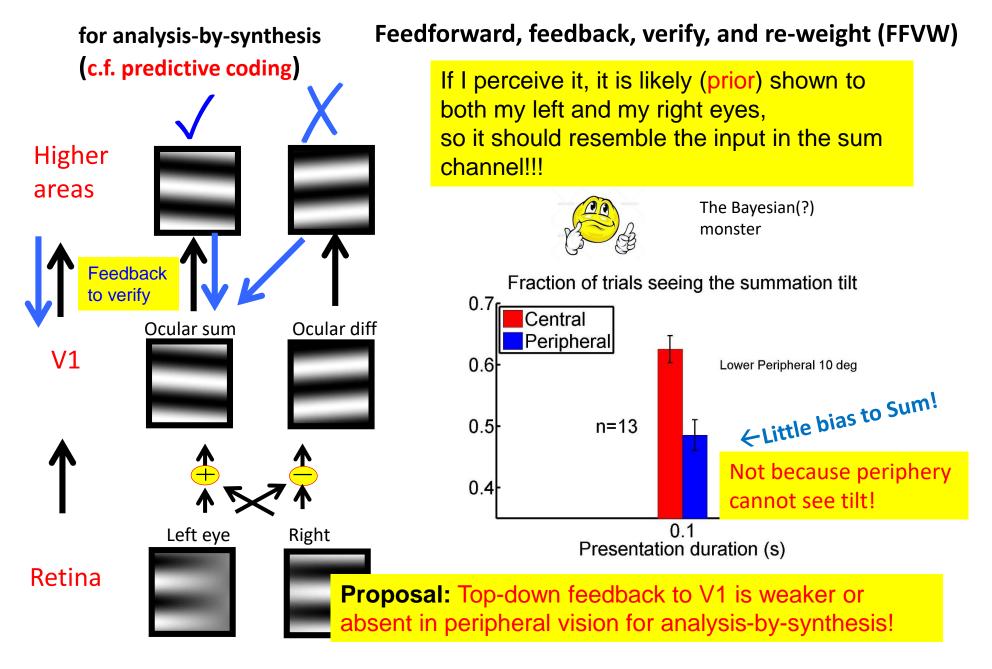

If I perceive it, it is likely (prior) shown to both my left and my right eyes, so it should resemble the input in the sum channel!!!
